Savitha Ranganathan Director's Message

Skill does not unfold in isolation. It needs an ecosystem, a community that reinforces a work ethic, that rewards positivity. Many of us, are not fortunate enough to be part of such an ecosystem.

At MITRAZ, we have built a thriving community that can spur and spiral youngsters towards success and excellence by arming them with skills and values that a conventional school may not have been able to infuse in them. As we step into third year of Skilling, we are looking for active contributors to help empower the needy and underprivileged of our society.
